Objective

Aspiring MERN Stack Developer currently pursuing MCA, with a strong foundation in web development and a passion for building scalable and efficient applications. Seeking opportunities to contribute to innovative projects while further enhancing my skills in a dynamic and collaborative environment.

Education

Master of Computer Applications (MCA)
MDU University, Rohtak, Haryana
Expected Graduation: 2025
Relevant Coursework: Data Structures, Algorithms, Database Management, Web Technologies

Skills

- **Programming Languages:** JavaScript, C++

- **Web Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js

- **Database Management:** MongoDB

- **Tools:** Git, Visual Studio Code, Postman, MongoDB Compass

Relevant Coursework

- **Web Development:** Covered HTML, CSS, JavaScript, and modern frameworks like React.js.

- **Database Management Systems:** Focused on non-relational (MongoDB) databases.

Projects

EdTech Application
Technologies: React.js, Node.js, MongoDB, Express.js
GitHub Repository | Live Application

- Developed a full-stack EdTech application that enables users to access and manage online courses, track their learning progress, and participate in interactive quizzes.

- Implemented user authentication, role-based access control, and real-time data synchronization between the front-end and back-end.

Netflix GPT Frontend
Technologies: React.js, Google Gemini API, TMDB API
GitHub Repository | Live Application

- Developed a Netflix-inspired front-end application using React.js that integrates the Google Gemini API and TMDB API to provide AI-driven content recommendations, interactive chat functionalities, and comprehensive movie and TV show data.

- Integrated AI-driven recommendation algorithms that leverage both Google Gemini and TMDB data to deliver tailored content suggestions to users.

Certifications

- Certified in Full-Stack Web Development from CodeHelp.

- Data Structures Certification from CodeHelp.
